

1. When to use String vs. StringBuilder in C# ?
  - If a string can change then using a StringBuilder is the best option.
2. What is the base class for all arrays in C#?
  - The Array class is base class for all arrays
3. How do you sort an array in C#?
  - Using Array.Sort() method
4. What property of an array object can be used to get the total number of elements in an array?
  - Length
5. Can you store multiple data types in System.Array?
  - No, we can store similar datatype only in an array but not multiple datatype
6. What's the difference between the System.Array.CopyTo() and System.Array.Clone()?
  - Clone is of the same type as original array
  - CopyTo is copied the elements into another existing array
